

Business Development Ltd New Zealand

Cloud Hosted Services

Our Cloud Hosted Service is a cloud-based service that enables you to remotely connect to a server physically located in a secured and reliable New Zealand Data Centre in Auckland. It offers the same functionality as having an in-house server in your office, but because your server is located in the cloud, your data is accessible anywhere and anytime of the day providing you have an internet connection.

Benefits of cloud desktop and server:

- Minimises hardware procurement expenses
- Expenses are on a per user, per monthly basis making budgeting easier
- Allows flexibility and mobility of staff to work anywhere, anytime
- Data is kept in a reliable and secured New Zealand Data Centre location
- Automated daily monitoring, maintenance and reporting of system for peace of mind and availability
- Reduces extra costs of IT support for installation, configuration and maintenance of hardware devices
- Compatible with mobile devices such as smartphones, tablets and laptops
- Migration of your current applications such as Microsoft Office, MYOB / financial software, Exchange, SQL, etc.

You can rest assured that our cloud service will help you enhance capability and reduce expenses while still allowing you control over your system with additional flexibility and high availability of your data.

We have two options available depending on your organisational structure and needs:
